# The Rotunda Hospital Dublin

## Monthly Maternity Activity Statement – December 2016

These summary statistics reflect the most recent monthly activity at The Rotunda Hospital Dublin. We hope that these data provide reassurance regarding the quality and safety of services at our hospital. These figures are not formatted in a way to support comparison with other hospitals or aggregation with other data. Given the complexity of care at our hospital, which is a national tertiary referral center, it is not appropriate to compare any of these statistics with other hospitals that have different patient numbers or types of clinical workload.

| | | | |
|---|---|---|---|
| **Hospital Activities** | 1 | Total mothers delivered ≥ 500g (n) | 735 |
| | 2 | Multiple pregnancies (n) | 16 |
| | 3 | Total births ≥ 500g (n) | 753 |
| | 4 | Perinatal mortality rate – adjusted (per 1,000 total births) | 4.7**** |
| | 5 | In utero transfer – admitted (n) | 4 |
| | 6 | In utero transfer – sent out (n) | 0 |
